Highlights European Parliament 2004-2009 - Telecom, Research, Media

In this mandate, Parliament adopted legislation that allowed fairer prices for consumers regarding Roaming. That concerned as well the charges for mobile data services and text messages sent from other Member States. Still pending is the legislation including measures to facilitate access to networks. MEPs called for strong support for the European Research programmes and want to bring forward the "European Research Infrastructure", which will make it easier for research projects to receive funding from several EU Member States. In the field of Media MEPs underlined the importance of Media pluralism. Furthermore on audiovisual services, legislation sets out new rules not only for TV broadcasters, but also for on - demand services like web-tv to promote European programmes. The EU Media programme 2007-2013 has been adopted with a €755 million budget by the European Parliament.

This product aims to illustrate the following topics:

- Roaming
- Telecom package, Harmonisation
- Research
- Eco-Innovative companies
- Media
- Pluralism
